

PATIENT CHECK-IN SYSTEM

SOFTWARE OVERVIEW

Take pressure off your reception staff and free up more of your front line time using our custom-built check-in kiosk solution.

Patients can check in directly to your Medical Database software using our friendly interactive touch screen solution.

FEATURES

- Standalone interface which can function on all networks and Hardware.
- Locked-down user interface will mean patients will never have access to your network or computers.
- Completely enabled for touch-screen devices for a clean, easy kiosk experience.
- Logging of all check-in attempts.

HARDWARE OVERVIEW

A sleek and contemporary kiosk designed to fit comfortably in the most elegant environments. The KIO190 Kiosk has a high-end aesthetic appeal, yet the construction is still robust enough to easily withstand general public use.

The 19" touch monitor is commercial quality which allows for extended 24/7 use and extreme reliability.

Proudly designed and manufactured in Australia.
